

TestGraphPathfinding
::testDijkstra_6_StartEqualsEnd

```
graph LR; A[TestGraphPathfinding::testDijkstra_6_StartEqualsEnd] --> B[Graph::findShortestPath]; B --> C[Graph::runDijkstra];
```

The diagram illustrates a sequence of three function calls. It begins with a test function, 'TestGraphPathfinding::testDijkstra_6_StartEqualsEnd', which is highlighted with a grey background. A blue arrow points from this test function to the 'Graph::findShortestPath' method. A second blue arrow points from 'Graph::findShortestPath' to the 'Graph::runDijkstra' method. All three components are contained within rectangular boxes with black borders.

Graph::findShortestPath

Graph::runDijkstra
