

TestGraphPathfinding
::testFindPath_3_HeightBlocked

```
graph LR; A[TestGraphPathfinding  
::testFindPath_3_HeightBlocked] --> B[Graph::findShortestPath]; B --> C[Graph::runDijkstra];
```

The diagram illustrates a sequence of three function calls. It begins with a test function, 'TestGraphPathfinding::testFindPath_3_HeightBlocked', which is highlighted with a grey background. A blue arrow points from this test function to the 'Graph::findShortestPath' function. A second blue arrow points from 'Graph::findShortestPath' to the 'Graph::runDijkstra' function. All three functions are contained within rectangular boxes with black borders.

Graph::findShortestPath

Graph::runDijkstra
